Trying to make the cosmos out of nothing. The same can't be said about the Dawkins afterword, which is both superfluous and silly. A Universe From Nothing is a great book: readable, informative and topical. Inexplicably, though, Dawkins compares it to On the Origin of Species, and suggests it might be cosmology's "deadliest blow to supernaturalism".

Community Reviews. Because there is a law such as gravity, the universe can and will create itself from nothing. Spontaneous creation is the reason there is something rather than nothing, why the universe exists, why we exist. It is not necessary to invoke God to light the blue touch paper and set the universe going.
