Chapter 13 - Stats: Modeling the World Flashcards | Quizlet

Work Step by Step. The responses are either Democrat, Republic, Independent, Other, or no response. Each of these represents a category that a person can fall in. These are not numbers that represent values with units so they will not be quantitative. Because each response represents a category of people, the response variable is a categorical variable.

Textbook Authors: Bock, David E.; Velleman, Paul F.; De Veaux, Richard D., ISBN-10: 0133151549, ISBN-13: 978-0-13315-154-1, Publisher: Pearson

McIntosh, William / Stats: Modeling the World pdf

390 Part VI Learning About the World d) The confidence interval that was calculated in Exercise 10 won't help us to estimate the sample size. That interval was for 90% confidence. Now we want 95% confidence. A quick estimate with a critical value of  $z^* = 2$  (from the 68-95-99.7 rule) gives us a sample size of 100, which will probably work fine.

Stats: Modeling the World: Chapter 8 Vocabulary Flashcards ...

Chapter 13 - Stats: Modeling the World. When groups of experimental units are similar, it is often a good idea to gather them together into blocks. By blocking we isolate the variability attributable to the differences between the blocks so that we can see the differences caused by the treatments more clearly.
